# Transforming Pre-Delivery Inspections with AI: The Future of Vehicle QA

Togg partners with Wyseye to redefine pre-delivery AI vehicle inspections and ensure flawless quality checks.

## THE CHALLENGE

Wyseye aims to redefine pre-delivery inspections in the automotive industry, addressing challenges such as ensuring flawless vehicle quality checks, detecting minor damages like dents and scratches, and verifying proper fitting of outer components. Partnering with Togg, Wyseye had the goal to deploy the advanced AI solution for comprehensive inspections, streamlining the delivery process, and enhancing user satisfaction. The project scope encompassed leveraging AI-driven technology to automate inspection processes and validate various use cases, ultimately optimizing the delivery experience and ensuring vehicles' impeccable condition upon handover.

## THE SOLUTION

The startup implemented their cutting-edge AI solution for pre-delivery inspections, leveraging advanced computer vision algorithms to detect and assess minor damages like dents and scratches on vehicles. Collaborating closely with Togg, they co-developed customized inspection processes tailored to their specific requirements. Their tech solution was seamlessly integrated with Togg's existing workflows, ensuring efficient and accurate inspections at scale. Through collaborative efforts across tech and business units, they overcame challenges related to data integration and process optimization, driving successful project outcomes.

## THE OUTCOME

Through their collaborative efforts, the teams achieved significant improvements in vehicle quality assurance, ensuring flawless deliveries and enhancing customer satisfaction. By integrating their technology into Togg's pre-delivery inspections, they streamlined the process, reducing manual efforts and minimizing the risk of oversight. This resulted in increased operational efficiency and cost savings for Togg, while also elevating their brand reputation for delivering high-quality vehicles. Looking ahead, the startup aims to further optimize the inspection process, explore additional use cases for their AI solution, and expand the collaboration with Togg to drive innovation in the automotive industry.

See deeply.

## Wyseye ensures flawless vehicle delivery by conducting comprehensive pre-delivery AI inspections.

Wyseye's technology enhances vehicle quality assurance through advanced AI inspections by leveraging a network of high-res cameras, coupled with advanced AI algorithms.

## ABOUT STARTUP AUTOBAHN

STARTUP AUTOBAHN powered by Plug and Play is an open innovation platform that provides an interface between innovative tech companies and industry-leading corporations. The basis of the program is the partnership that develops between startups and the corporate business units. The two entities hold an equal footing from the get-go: together they evaluate the potential for a joint venture, move forward to pilot the technology, and work to achieve the ultimate goal – a successful production-ready implementation. Designed with the intention to exceed startup acceleration, STARTUP AUTOBAHN powered by Plug and Play moderates a community for collaboration with a focus on implementable results. Over the years, the platform has successfully cultivated over 400 projects with more than 300 startups since its founding in 2016.

## ACKNOWLEDGEMENTS

We would like to express our sincere thanks to Ahmet Duran (Togg) and Enes Koşar (Wyseye).
